

About Neptune

Neptune Technologies & Bioresources is a pioneer in the development of omega-3 phospholipids in the Healthcare industry, as it has researched for almost two decades, their innovative properties through multiple studies from benchmark to market, leading to the creation of , the ORIGINAL KRILL OIL.

Through diligent science, an extensive patent portfolio, regulatory approvals and strategic partnerships, Neptune has created the krill oil industry.

- Neptune is committed to providing top quality krill oils that are 100% pure and "Friend of the Sea" certified.
- Neptune pursues its market opportunities through nutraceutical partners and in the pharmaceutical market through its subsidiaries Acasti Pharma and NeuroBioPharm.
- Neptune has multiple patents issued worldwide covering: process, composition of matter and method of use.
- Neptune is a publicly listed biotechnology company (NASDAQ: NEPT, TSX: NTB) based in Quebec, Canada.

The Original Krill Oil

- Naturally sourced from 100% Antarctic krill.
- Contains a unique blend of omega-3 fatty acids (EPA & DHA), in the form of phospholipids and astaxanthin, a super-antioxidant.
- Unlike fish oil, this phospholipid form makes the fatty acids significantly more bioavailable.
- Patented extraction process maximizes 's active ingredients making it superior to other krill oils.
- Clinically studied for heart, joint, cognitive and women's health.
- Free of potentially harmful levels of heavy metals and contaminants.

Sustainable Resource

- Neptune harvests Antarctic Krill (*Euphausia superba*) in pure uncontaminated deep sea waters.
- Precautionary catch limits on the Antarctic krill fishery are under constant review by CCAMLR¹.
- Neptune has obtained the “Friend of the Sea” certification for its sustainable krill harvest.

Antarctic Krill Biomass

(Approximately 420 million tons)

2.07%

In 2011-12, only 2.1% of the precautionary Antarctic krill catch limit was harvested, representing approximately 0.04% of the biomass.²

Astaxanthin

Industry's most potent astaxanthin content

Astaxanthin a super-antioxidant

- **Improves** heart health by increasing serum HDL-cholesterol
- **Reduces** inflammation in blood vessels & maintains their integrity.
- **Protects** the brain, central nervous system & eyes due to its unique ability to cross the blood-brain barrier.
- **Increases** skin moisture retention, improves fine wrinkles & overall skin condition

Power in Every  Drop
